PROJECTS

- 2020
- NARASUMBER** – An Amazing Website to Find Professional Public Speakers.
 - + Designed and developed by my team in 2 weeks with Mongo DB, Express, React JS, and Node JS.
 - + Excellent features to find speakers from location and have 6 category expertise of the public speakers.
 - + As Back End, I design the database and use 5 Models for this web.
 - TASK MANAGEMENT** – Dashboard web for tasks administration.
 - + Created in 1 week by my team, this website applies MERN stacks and does operate perfectly.
 - + Simple and easy UI/UX, with CRUD and more than 5 options for users.
 - + As a Team leader, I configure 2 deployments (Back end and Front end) and settle my team to collaborate for this website.
 - MY WATCH**– Simple watch marketplace
 - + Devised in 5 days with HTML, CSS, and Javascript, this website provides data from mock API.
 - + Users can add items (watch) to the cart and the item will be sent to My Watch mock API data. After that, the cart icon increased by 1.
